

# Case study

## May Tree Gates

### Key facts

**Key vendors:** Dave Greening Limited  
**Site:** Dave Greening Limited  
**Sector:** Housing  
**Client:** Dave Greening Limited  
**Contractor:** Dave Greening Limited

### Brief

The developers required a product which not only blended with the surrounding buildings and location, but was also an economical alternative to natural stone.

### Solution

Crofters Slates, as well as Traditional walling and Cast Stone, were specified by the client for this small housing development. Moulded from original natural stone, Crofters Slates provide the attractive appearance of a natural stone roof combined with the simplicity of using a single-sized product.

"We used Bradstone's Crofters Slates as they complemented Bradstone Traditional which we also specified. The slates suit the environment well and were a cost-effective solution for this development."

**Dave Greening, Dave Greening Limited**
