

LAYING STEPPING STONES

STEP 1: Evenly space the stepping stones across the lawn or border.

STEP 2: Using the stepping stone as a template, cut away the surrounding turf or soil to a depth of approximately 75mm.

STEP 3: Infill with sharp sand to a depth of 35-40mm or use a weak semi dry mix of 5 parts sand and 1 part cement.

STEP 4: Place stepping stone and tap down gently with a rubber mallet so that it sits just below the level of the lawn.
