Delivering value in construction materials and services

Delivering value in construction materials and services

**Aggregate Industries is a leading player in the construction industry.
We produce and supply a wide range of construction materials including:**

Aggregates

Bardon Aggregate supplies crushed rock, sand and gravel, stone and fill materials for construction. These can be delivered by road, rail or marine transport. Garside Sands (01525 237 911) produces silica and specialist sands.

We have unrivalled access to the highest quality raw materials, concrete technology and research teams. This expertise is constantly being channelled into developing new and innovative product solutions.

We see our goal as not only providing the highest quality and most sustainable materials, but also as a valuable support service for our customers, clients and others within the supply chain. We are 100% committed to the health and safety of our employees and partners and regard our high levels of customer service a priority in creating best value solutions for the industry.

The Responsible Source™

The Responsible Source™

As a supplier and manufacturer of concrete and aggregate products we have been working for more than a decade to create sustainable solutions for all our core markets.

We have been addressing issues such as health and safety, quality, ethical trading, carbon and water management, biodiversity and social responsibility so that we can offer our customers truly sustainable solutions.

This work has culminated in us becoming the first company in the world to be certified to BES 6001, framework for responsible sourcing of construction materials, by the Building Research Establishment (BRE).

The BES 6001 standard enables our customers to have full confidence in sourcing materials from a responsible manufacturer under stringent criteria such as organisational management, environmental and social performance. This helps our customers, clients, architects and specifiers to meet sustainability targets more easily.

All Aggregate Industries' UK manufactured products have a certified minimum rating of VERY GOOD under the BES 6001 standard.
