

# INTRODUCING SuperPatch®

SuperPatch® is a deferred set asphalt material which can be supplied either bagged or in bulk it offers installers an opportunity to maintain a stock of material on their premises so that they always have a superior quality material available for immediate use. It's supplied in three grades for day working, extended storage and permanent reinstatement applications.

## WHY SUPERPATCH®?

### WORKABLE

SuperPatch® uses the most effective flux materials and water-based emulsion technology to keep the product workable, ensuring consistent and predictable performance.

### RELIABLE

Extensive shelf life, making it a reliable solution for emergency repairs for the utility, building merchants and DIY sectors.

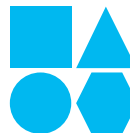

### CONVENIENT

SuperPatch can be bagged, so you have it conveniently on-hand, with the confidence of our extended storage grade.

### QUALITY ASSURED

SuperPatch® has been developed to comply with Highway Authorities and Utilities Committee (HAUC) specifications as a 'temporary' reinstatement material - as outlined in the Department for Transport code of practice; UK Specification for Reinstatement of Openings in Highways (SROH).

### VERSATILE

Supplied in three grades\* for day working, extended storage and permanent reinstatement applications.
