

Agilia

Supreme free flowing concrete designed to save you time and money

Agilia

Agilia is a self compacting concrete that brings new opportunities to architect, engineer and contractor. Agilia concrete will flow freely around congested reinforcement without the need for vibration or other energy input. It can be used in virtually any form of construction from housing to heavy civil engineering projects.

Aggregate Industries offer the customer a complete service from the supply of curing agents and the training of site supervisors and operatives, to a guaranteed delivery within a 60 minute window and a guarantee that subsequent loads will each arrive in a timely manner.

Product

Agilia Vertical (Agilia V)

Agilia Horizontal (Agilia H).

Applications

Agilia Vertical

- Walls with large openings or cast in items
- Aesthetic concrete or architectural concrete
- Heavily reinforced elements.

Agilia Horizontal

- Slab on grade
- Overlaying existing slabs for levelling
- Elevated slabs
- Light industrial and domestic standard flooring.
- Block and beam floors.

Key Benefits

- Potential cost savings through shorter construction time, reduced labour for placing, finishing and remedial costs.
- Less finishing required, which is ideal for domestic flooring when laying carpet, tiles or wood
- Excellent flowability through congested reinforcing steels (Rebar), ensuring full bonding
- Environmental benefits including no vibration and noise reduction during placement
- Worksite flexibility
- Easy placement
- High surface quality, consistency of finished appearance
- Allows enhanced design creativity including colour.

Characteristics

- Compressive strengths from C20/25 to C50/60
- Available in slump flow classes SF1 to SF3
- Conforms to specified limits for minimum cement content and maximum water cement ratio.

Technical Support

Aggregate Industries Technical Services will provide advice, support and assistance in all aspects of the selection and use of Agilia concretes.

Inclusion of Curing Agent, Dapple Bar and Sprayer

60 minute waiting time

Applicator training

Guaranteed Delivery Slots

Time between loads no greater than 30 minutes
