BRADSTONE OLD QUARRIED STONE ROOFING
WHY CHOOSE BRADSTONE OLD QUARRIED?

Old Quarried is the perfect alternative to natural stone slates. Made from reconstructed stone, it has an incredibly natural look, is cost effective and environmentally astute.

Cast from natural stone slates, Old Quarried boasts authentic markings which makes the range fit perfectly into rural settings - with the natural appearance replicating much of the stone flag roofing found in the North of England. On top of this, it is available in a unique Lichen Green shade, making it the perfect option for buildings in heritage and conservation areas.

By the very nature of its reconstructed manufacture, Old Quarried Stone slates are made to much more efficient sizes. This makes installation far quicker and easier, saving time and cost. Plus, the cost to the environment is decreased because minimal new stone has to be quarried to create it.

From refurbishments to housing and commercial roofing projects, Old Quarried sits naturally atop many buildings. Take a look at some of the projects we've completed for a range of customers.

**LONG ASHES PARK
NEW CONFERENCE CENTRE**

Old Quarried roofing slates chosen to seamlessly blend the new conference centre and accommodation blocks into the picturesque surroundings of the Yorkshire Dales.

Set within Wharfedale, one of the largest and most attractive valleys in the Yorkshire Dales National Park, it was crucial that the Long Ashes Park Conference Centre mirrored the outstanding beauty surrounding it. Ted Fletcher Architects worked closely with The Yorkshire Dales Planning Authority to ensure this would happen by opting for Bradstone Old Quarried roofing slates as the most suitable product.

This simple range of roofing offers diminishing courses and random widths which gives the slates a heavy stone appearance that fits the aesthetics of the surroundings. The reconstituted nature of Old Quarried also means that Ted Fletcher Architects and any other customers get a high quality product for fantastic value.

11 LUXURY PINE LODGES IN THE HEART OF LONG ASHES PARK

A development of eleven luxury pine lodges crafted to the highest standards and inspired by Scandinavian living.

Customer: Lakeland Leisure Estates Ltd
Architect: Ted Fletcher Architects
Contractor: RLM Joinery
Product Used: Bradstone Old Quarried Light Weathered Buff roofing

The individually designed luxury lodges feature Scandinavian inspired horizontal stained larch clad exteriors. Including a range of 3 bedroom and 4 bedroom lodges with accommodation over two floors. This maximised the superb views over the Wharfedale Valley and Yorkshire Dales.

Built to the highest quality specification, the development had to be in keeping with the local surroundings so incorporated Bradstone Old Quarried Light Weathered Buff slates, subtly adding to the outstanding natural beauty.

MAXIMISING THE VIEWS OVER THE WHARFEDALE VALLEY AND YORKSHIRE DALES
22 AFFORDABLE FAMILY HOMES BUILT INTO THE YORKSHIRE DALES LANDSCAPE

Building new affordable housing in a picturesque setting

Yorkshire Housing’s sheltered housing scheme worked in partnership with Craven District Council and the Yorkshire Dales National Park Authority. This affiliation provided 14 houses and 8 apartments of 2 and 3 bed properties, as affordable family homes to meet local housing needs.

The scheme looked to provide new affordable housing whilst ensuring it was totally in keeping with the picturesque Yorkshire Dales village of Grassington. For this reason Bradstone Old Quarried Light Weathered Buff roof slates was the preferred choice of both the architect and planning authority.

CASE STUDY
NEW LOOK GRASSINGTON FIRE STATION

Grassington fire station redeveloped to the high standards laid down by the Yorkshire Dales Planning Authority.

Customer: North Yorkshire Fire and Rescue
Architect: 2H Architecture
Main contractor: Walter Thompson
Roofing contractor: Premier Roofing Ltd
Product Used: Bradstone Old Quarried Light Weathered Buff roofing

The fire station was completed after a £750,000 investment. The building had to meet local planning requirements and adhere to the local vernacular, thus using a combination of Bradstone Old Quarried slate roofing and cedar boarded cladding.

The fire station houses fire appliances, a lecture room, kitchen, toilets, showers, a communication room, an office for the watch manager, equipment store and a muster room.

The original fire station was opened 25 years ago in Grassington and now serves around 9,200 people and responds to between 60 and 70 calls a year. The latest building at Grassington has been designed sustainably to achieve BREEAM ‘Very Good’ Standard when completed.

SUMMERBRIDGE FIRE STATION

A redevelopment of the old fire station enhanced using Bradstone Old Quarried roofing slates.

Customer: North Yorkshire Fire and Rescue
Architect: 2H Architecture
Main contractor: Parkinson Building Contractors
Roofing contractor: Bradford Roofing Ltd
Product Used: Bradstone Old Quarried Lichen Green roofing

The new Summerbridge fire station has been built in the village of Summerbridge, Harrogate. Planning permission was granted by Harrogate Borough Council.

Simon Garnett-Spence, North Yorkshire Fire & Rescue’s Head of Technical Services, said the fire station would be a “single bay” station accommodating one fire engine, with associated office space, to replace the old Summerbridge fire station which is now undersized.

There are nine retained firefighters currently based in Summerbridge but the fire service is now recruiting more retained firefighters since the completion of the new station.
Planning officers backed the application to build a 19-bed extension to the Premier Inn, Gargrave. Officials recommended the scheme be originally approved at Craven District Council and planning committee meeting but comprehensive landscape proposal had to accompany the application.

This helped to reduce the overall impact of the hotel on the surrounding area. Primarily, this included the restriction of building materials used and Bradstone products were considered the best candidate to meet the strict conditions. Officers felt the design was sympathetic to the surroundings being built from quality Bradstone reconstituted walling and Old Quarried stone slate roofing. This demonstrates how Bradstone walling and roofing work together in perfect harmony.

**THE ANCHOR PREMIER INN HOTEL**

- **19 bedroom extension to the Anchor Premier Inn hotel.**

BROUGHTON FIELDS FARM
ARCHITECTURAL STONE BUILDING

We gave this traditional stone built workers dwelling a roof that is perfectly aligned with its historical features.

Architect:
OB Architecture

Contractor:
Tidswell Roofing Contractors,
Lothersdale, Skipton

Product used:
Bradstone Old Quarried Lichen Green roofing

Bradstone Old Quarried was recommended by the local planning and roofing contractor because of its authentic natural slate look. Unlike many other competitors, its unique Lichen Green shade doesn’t present an artificial look.

The weight of Old Quarried stone also provided a major benefit over alternative products. With high winds common in this area, the heavier weight of this product ensures that problems are far less likely to occur. All in all, the features and benefits of Old Quarried stone delivered both the aesthetic and practical elements of the project.
THE OLD QUARRY RESIDENTIAL DEVELOPMENT SOUTH YORKSHIRE

For this new build private property, the architect was keen to specify a roof that looked at home in the surrounding area. By selecting Bradstone Old Quarried in Lichen Green, they could benefit from readily available reconstituted stone products with the look of natural stone.

BOLTON ABBEY ESTATE OFFICES

The roof tops of Bolton Abbey’s Estate Offices needed to be rebuilt with roof slates that were sympathetic to the aesthetics of the local 12th Century Augustinian architecture. As well as this, it was important that the project was delivered within a set budget.

Aggregate Industries offers complete building product solutions by bringing together our roofing, walling, architectural facing masonry, aggregate concrete blocks and packed cement ranges.

**BRADSTONE ROOFING**
Bradstone roofing products offer the authentic look and feel of highly aesthetic natural stone roofing but in high quality, easily available, sustainable materials.

**BRADSTONE WALLING**
Bradstone walling combines the look and feel of traditional natural stone with the high performance, long life and low maintenance qualities of modern materials.

**MASTERBLOCK ARCHITECTURAL FACING MASONRY**
Our architectural facing masonry walling ranges are high quality, cost effective and often achieve an A+ Green Guide rating.

**MASTERBLOCK CONCRETE BLOCKS**
Aggregate Industries is one of the UK’s largest manufacturers of dense and lightweight aggregate concrete blocks supplied for the commercial and housing markets.

**LAFARGE PACKED PRODUCTS**
Our range of Lafarge packed products are developed specifically to meet the demands of the modern building industry. The range includes General Purpose, Sulfate Resistant, Pozzolin, Hydrated Lime and Super White.

---

The Aggregate Industries group offers an extensive range of products and services to the construction industry.

**AGGREGATES**
We supply crushed rock, sand and gravel, stone and fill materials for construction. These can be delivered by road, rail or marine transport. We also produce silica and specialist sands.
Tel: 01455 285200
Email: aggregates@aggregate.com

**ASPHALT**
We are a leading supplier of a full range of coated materials with over 50 locations in the UK, serving major conurbations, including sites for collect business.
Tel: 01455 286222
Email: asphalt@aggregate.com

**CONCRETE**
We offer a complete range of ready-mixed concretes and screeds, operating from over 70 sites. We also have an operation that caters for smaller collect loads.
Tel: 01283 714187
Email: concrete@aggregate.com

**CEMENTITIOUS MATERIALS**
Lafarge Cement offers a wide variety of bulk and packed cementitious materials, produced at our cement plants in Cauldon, Staffordshire and Cookstown, County Tyrone as well as nationwide terminals.
Tel: 01455 288392
Email: cementitious@aggregate.com

**CONSTRUCTION SOLUTIONS**
Our Charcon Construction Solutions business offers design, manufacture and installation of integrated offshore solutions including flooring, ground and access solutions.
Tel: 01670 531160
Email: sales@charconcs.com

**CONTRACTING**
We strengthen our construction materials portfolio through our involvement in infrastructure, surfacing and civil contracting works.
Tel: 01530 510066
