

GARSDIE SANDS PRO ARENA

Washed fine silica sand.

APPLICATIONS

- ▶ Equestrian surfaces and greyhound tracks

AVAILABLE IN

- ▶ Loose: bulk tipplers
- ▶ Bulk bags (tote)

DESCRIPTION

Garside Sands Pro Arena is a trusted equestrian silica sand used for both indoor and outdoor arenas to give you the confidence required for the perfect riding surface.

Garside Sands Pro Arena is ideal for your equestrian arena due to its high silica content, free-draining capabilities and subangular shape. Used in conjunction with your choice of additive it will provide excellent compaction to ensure the best ride possible - whatever the weather. As a major investment, we understand your riding surface must meet the highest of standards first time.

Garside Sands specialist sands are tried and tested with market-leading quality across a complete range of products and applications.

SOURCE

Leighton Buzzard, Bedfordshire

GEOLOGY

Lower Greensand of the Cretaceous period

COMPOSITION

Quartz

GRAIN SHAPE

Sub-angular to rounded

MECHANICAL ANALYSIS

Sieve size (mm)	Typical grading % retained	Description
2 to 5	0	Fine gravel
1 to 2	0	Very coarse sand
0.5 to 1	0	Coarse sand
0.25 to 0.5	17	Medium sand
0.125 to 0.25	74	Fine sand
0.063 to 0.125	8	Very fine sand
<0.063	<1	Silt plus clay
Particle Density		2.63 Mg/m ³
Uncompacted bulk density		1.42 Mg/m ³
AFS (Typical Value)		74
AGS (Typical Value)		193

NOTE:

Gradation figures stated are indicative value, for specific grading values please contact Aggregate Industries Technical Department.

Sand is a naturally occurring product, therefore colour may vary.

SUSTAINABILITY AND LOCAL SOURCING

Recyclable

100% of the product can be recycled thus reducing the amount of material that is sent to landfill.

Manufacturing location
